 - ✓ Lagos-Based, Africa-Focused

AUDIENCE

Built for Anyone Ready to Break Into Tech

This program was designed for three types of people — wherever you're starting from, there's a place for you here.

Beginners

No prior coding experience needed. Just a laptop, curiosity, and the commitment to show up every week.

Career Switchers

Professionals in any field who are ready to move into a high-earning tech role. Your past experience is an asset, not a barrier.

Students

University students who want job-ready skills, not just academic theory. Graduate with a portfolio, not just a certificate.

Minimum Requirements

- Personal laptop or PC
- 250GB storage · 4GB RAM
- Camera and microphone
- Stable internet connection

PROGRAM STRUCTURE

Three Stages. One Career.

Every student moves through three structured phases designed to take you from learning to earning.

STAGE 1

Learn

Curriculum & Core Skills

12 weeks of live classes, recorded lectures, and expert-led sessions. Our curriculum is designed to build deep understanding of core programming principles.

- ✓ Foundational programming concepts
- ✓ Live expert-led sessions
- ✓ Hands-on build projects

STAGE 2

Intern

Real-World Internship

Apply your skills to live systems. Work on real projects alongside mentors and peers. Build a professional portfolio that demonstrates you can deliver.

- ✓ Industry-level projects
- ✓ Collaborative team environment
- ✓ Professional portfolio development

STAGE 3

Get Hired

Recruitment Support

We don't just teach you — we help you land the job. Resume building, mock interviews, and direct connections to hiring managers.

- ✓ Resume building & LinkedIn optimisation
- ✓ Mock interviews with experts
- ✓ Networking with top employers

Choose Your Track — 7 Paths to a Tech Career

All tracks run for 12 weeks, 100% remotely. Pick the path that best matches your goals and the career you're building toward.

#	Track	Core Technologies	What You'll Do
1	Frontend Development	HTML · CSS · JavaScript · React	Build stunning, interactive websites and web applications
2	Backend Development (.NET)	C# · .NET · REST APIs · SQL Server	Build robust, scalable enterprise APIs and systems
3	Backend Development (Python)	Python · Django · REST APIs · PostgreSQL	Develop high-performance backends with Python
4	Cloud Computing	AWS · Azure · Cloud Architecture · DevOps	Master cloud platforms, deployments, and cloud-native services
5	Data Analysis	SQL · Power BI · Excel · Python · Tableau	Uncover insights and tell compelling stories through data
6	UI/UX Design	Figma · User Research · Prototyping	Design intuitive, user-centred digital experiences
7	Cybersecurity	Network Security · Ethical Hacking	Protect systems, networks, and data from digital threats

All tracks: 12 weeks · 100% Remote · Live sessions + recorded lectures · Flexible for students and working professionals

Real People. Real Results.

Hear from students who have walked the path before you.

"Scalefort provided me with a solid foundation in programming, equipping me with the technical skills I needed to thrive in the tech industry. The hands-on learning approach, coupled with expert mentorship, helped me build confidence in my abilities."

Maureen O. · Software Engineer · Cohort 2

"The structured learning, practical projects, and supportive mentors provided all I needed to transition into tech confidently."

Samuel Akinwale · Tech School Graduate

"Scalefort gave me the skills and confidence to excel in tech. The hands-on projects, expert mentorship, and real-world focus made all the difference."

Bakare Halimat · Tech School Graduate
