What Every Nigerian Tech Professional Should Know

The Nigerian tech job market grew faster in 2025 than any year prior—and salaries followed. But most professionals still negotiate blind, accepting offers without knowing what their peers earn. This guide changes that.

How to read this guide

All figures are monthly in Nigerian Naira (₦). Ranges reflect roles based in Lagos and Abuja—the two dominant tech hubs. Remote roles with international clients may pay significantly above the ranges shown. Figures represent base salary only, excluding bonuses, equity, or non-cash benefits.

- Entry level = 0–1 year of professional experience
- Mid-level = 2–4 years of professional experience
- Senior = 5+ years of professional experience
- Ranges widen at senior level because specialisation, certifications, and leadership skills create large salary gaps

Monthly Salaries by Track & Experience Level

Entry = 0–1yr · Mid = 2–4yr · Senior = 5+yr

TRACK	ENTRY (0–1 YR)	MID (2–4 YR)	SENIOR (5+ YR)
Frontend Development	₦180,000– ₦280,000	₦350,000– ₦500,000	₦550,000– ₦900,000
Backend Development (.NET)	₦200,000– ₦320,000	₦400,000– ₦600,000	₦650,000– ₦1,400,000
Backend Development (Python/Django)	₦180,000– ₦300,000	₦380,000– ₦580,000	₦600,000– ₦1,000,000
Cloud Computing	₦250,000– ₦400,000	₦500,000– ₦750,000	₦800,000– ₦1,400,000
Data Analysis	₦150,000– ₦250,000	₦300,000– ₦480,000	₦500,000– ₦850,000
UI/UX Design	₦150,000– ₦250,000	₦280,000– ₦420,000	₦450,000– ₦750,000
Cybersecurity	₦220,000– ₦380,000	₦450,000– ₦680,000	₦750,000– ₦1,300,000

Figures are monthly in Nigerian Naira (₦). Base salary only. Lagos/Abuja benchmark.

Highest Ceiling: Cloud Computing reaches ₦1,400,000/month for senior pros.

Certification Premium: Cybersecurity certified pros earn 30–40% above base ranges.

Parity: Frontend and Python Backend track within <10% of each other at all levels.

Growth Story: Data Analysis mid-to-senior growth is strong as companies invest in analytics.

UI/UX: Lowest floor but scales well with portfolio quality and client network.

What Each Level Really Means

Years on a CV matter less than these markers.

Entry Level

0-1 YEAR

Fresh graduates and bootcamp completers. Can build real features independently. Portfolio matters more than years.

Key Signals:

- › Active GitHub with projects
- › Explains tech decisions
- › Internship experience
- › Completed full project

Mid-Level

2-4 YEARS

Owens features end-to-end. Mentors juniors. Cloud or specialisation knowledge starts separating top earners.

Key Signals:

- › Shipped production code
- › Code review experience
- › System design basics
- › Pursuing certifications

Senior Level

5+ YEARS

Architects systems. Influences direction. Certifications and leadership define this tier. Remote roles accessible here.

Key Signals:

- › Designed full systems
- › Complex delivery record
- › Leads technical teams
- › Industry certifications

5 Ways to Earn More in Nigerian Tech

The specific moves that separate top earners from average earners in the Lagos market.

01

Get Certified

AWS, Azure, and Google Cloud certs can add ~~₦100k~~–~~₦200k~~ to annual salary.

Path: AWS Cloud Practitioner → Solutions Architect

02

Build in Public

An active GitHub matters more than a degree. Make it easy for recruiters to see your code.

Target: 3 completed projects

03

Negotiate with Data

Use this guide. Most candidates accept the first offer. Don't.

"Based on market rates..."

04

Specialise Early

Hybrid skills (e.g., Python + Data Engineering) earn 25–40% above average.

05

Target Fintech

Paystack, Flutterwave, Moniepoint, PiggyVest, Kuda consistently pay top-of-band salaries plus equity.

Ready to Earn at the Top of These Ranges?

Scalefort's 12-week bootcamp takes you from beginner to job-ready with real skills and internships.

- 12 weeks of expert-led, live instruction
